

NOTICE

Pursuant to Executive Order 9-20, issued by Governor Jim Justice on March 23, 2020, West Virginia residents are ordered to stay at home unless obtaining non-elective medical care and treatment and other vital services.

Accordingly, if you are seeking medical services at this time, please be aware that **there is a significantly greater risk that you may be exposed to others who have either been exposed to or are suffering symptoms of COVID-19.**

If you are here for elective or non-urgent care, we ask that you do not enter this facility. Instead, we ask that you return to your vehicle or home and telephone us at (304) 236-5902, so that we can schedule/reschedule you for a later date when there is a lesser risk of exposure to COVID-19.

By entering this facility at this time, you are agreeing that you require essential, urgent, or emergent medical services. We will do our best to provide you with that care in the safest manner possible under these unique and difficult circumstances. Please note, however, that even though this facility has taken all reasonable precautions to minimize the risks of exposure to COVID-19, it is possible to be exposed to patients and/or staff who are not currently showing any symptoms of the virus. Please be mindful of social distancing.

If you are unsure if the care you seek is considered “urgent” or “emergent,” we ask that you return to your vehicle and call us at (304) 236-5902, so that we can discuss your care and make a recommendation regarding next steps.

We thank you for your understanding and cooperation with this request!
